Professional Summary

Final-year Computer Science student and AI Engineer with 9 months of hands-on experience across the AI application stack – from LLM-powered agents and workflow automation using n8n and Activepieces to web applications and APIs using React, FastAPI, and REST. Built and shipped practical, end-to-end AI tools for interview screening, automated customer review responses, and emergency notification systems.

Professional Experience

Tarcin Robotics

Sep 2025 – Jun 2026

AI Engineer Intern

Madurai, India

- Cut workflow execution time from 1–3 hours to under 5 minutes by building 50+ automated workflows in n8n and Activepieces.
- Shipped 5 AI-enabled web applications integrating 2–4 REST APIs each, including 1 production app used by 3–6 internal team members.
- Automated 5–10 recurring operational tasks – some on a 3-day cycle, others tied to active event periods – cutting hours of manual work per cycle.
- Integrated Gmail, Google Sheets, and Google Drive with LLM APIs (Groq, Gemini, OpenRouter) to power automated notifications, lightweight data storage, and file handling.

Featured Projects

AI Interviewer – Mock Screening Suite | *React, FastAPI, SQLite* | GitHub

- Developed a full-stack AI interview platform with secure user authentication.
- Implemented OCR-based resume parsing and generated interview questions via LLM APIs (Groq, Gemini, OpenRouter), plus voice-based interviews using Speech-to-Text and Text-to-Speech.
- Tested end-to-end with 5 resumes across 10 mock interview sessions, automating candidate evaluation via LLM-generated feedback reports.
- Generated structured interview reports highlighting candidate strengths, improvement areas, and overall performance analysis.

Automatic Google Review Reply using AI Agent | *Activepieces, REST APIs*

- Built an autonomous Activepieces workflow that fetches Google Business reviews without manual intervention.
- Generated context-aware responses via LLM APIs (Groq, Gemini, OpenRouter) through API integrations, tested across 20–30 real customer reviews.
- Automated personalized review replies based on customer sentiment, reducing manual response effort; currently in active use at Tarcin Robotics.

Automated Blood Alert System | *n8n, Google Sheets API* | GitHub

- Developed an automated blood donor notification system using n8n workflows.
- Integrated Google Sheets for donor management and blood-group filtering.
- Validated end-to-end with a test donor dataset, confirming automatic emergency email alerts were sent successfully to matching donors.

Technical Skills

Programming: Python, SQL, JavaScript, TypeScript

AI/ML: LLM Applications, AI Agents, Prompt Engineering, OCR, PyTorch, LangChain, RAG (Retrieval-Augmented Generation)

Model APIs: Groq, Gemini, OpenRouter

AI Frameworks / Automation Tools: n8n, Activepieces

Web: React, FastAPI, HTML, CSS

Databases: MySQL, SQLite, PostgreSQL

Tools / Deployment: Git, GitHub, Docker, Postman, REST APIs, Google Sheets API

Education

KLN College of Engineering

Madurai, India

Bachelor of Engineering, Computer Science Engineering

2022 – 2026

Certifications

- Agentic AI Hands-on – IBM Skills Network (Cognitive Class), Nov 2025
- Automate Everything With n8n – LetsUpgrade (NSDC-affiliated), May 2026
- AI Tools & ChatGPT Workshop – be10x, Mar 2026
